

Want to list your comic work on your website?

Would you like the freedom of not having to update it?

COMICBOOKDB.COM CAN HELP YOU WITH YOUR COMICOGRAPHY

1. All you have to is put a single line of code on your webpage which we will supply. This will display a frame on your website.
2. That frame contains a page on our server that lists all of your work that we keep track of so that when a change is made or an issue is added, it is instantly reflected on your website (see examples below).
